Follow these steps when ordering

Step 1: Choose your plow blade

Plow

Standard Plow Blade:

- Made from 14 gauge high-strength low alloy steel with 3/16" outer blade ribs to provide superior strength and rigidity.
- Blade height is 16-3/16" high.
- Now includes heavy-duty skid plates made of 1/4" thick steel with zinc finish.
- Available in 48", 54" or 60" widths.

Plow Cyclone

Cyclone Angles Plow Blade:

- Tapered design and aggressively curved profile steer snow or dirt up and away from the surface you're clearing.
- Made from heavy-duty 11-gauge steel backed up by extraheavy ribbing.
- Heavy-duty skid plates are made of 1/4" thick steel with zinc finish.
- Available in 54" or 60" widths

Rubber Plow Protection

Yamaha	Grizzly 700 2006+	73996	71 €	C

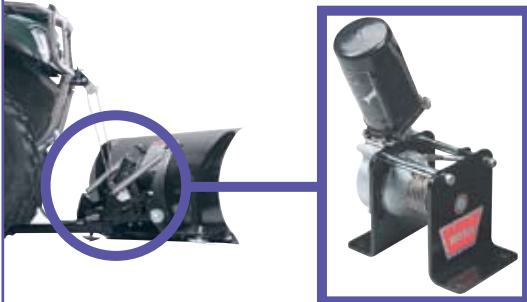

- Mounting plate remains attached to the ATV and becomes a structural component adding rigidity to the ATV during plowing operations.
- Designed for quick plow installation or removal.
- Placement is forward of the foot pegs to avoid any reduction of ground clearance or operating interference.

Step 4: Pick your blade raising system

Electric Actuator

Artnr Excl
67650 250 € C

- Designed with a dual purpose in mind: to lift the plow without manual effort, and leave the winch for what it was designed to do.
- Pulling capacity is more than enough power to lift the heaviest blade.
- All-weather, handlebar mounted switch.

Winch

- An excellent choice if you want a multi-use piece of equipment.
- For durability, the WARN synthetic rope and/or plow roller fairlead is strongly recommended.

* Multi-Mount winch is not recommended for use as a plow blade lift.

Manual Lift

- Lever-style arm delivers maximum lifting power while requiring minimal force to lift the blade, reducing operator fatigue.
- Overall lift height is 8 inches or more, so you can clear obstacles like curbs.
- Lift is easily detached along with the entire plow/arm assembly, freeing the ATV for other uses.

Artnr Excl
65510 170 € C
